

PRESS RELEASE – 9 September 2015

Peregrine now offers Part 25 AML STC for BendixKing's CAS 67B TCAS II Version 7.1

In August, Peregrine received approval of their TCAS II v7.1 STC. Peregrine's STC updates the existing BendixKing CAS 67 system to support Traffic Alert and Collision Avoidance System (TCAS II) Version 7.1. This certification is a multiple model Approved Model List (AML) STC for the Learjet 31A, Cessna 650, Hawker 800A, Gulfstream GIV, and the Bombardier Challenger CL-601-3A & CL-601-3R aircraft. The upgraded BendixKing CAS 67B system incorporates software updates to provide for Change 7.1 compliance.

This STC addresses the European mandate for implementing TCAS II Change 7.1 for aircraft operating in European airspace. The EASA mandate calls for Change 7.1 upgrade to be accomplished on all existing aircraft using TCAS II products by December 2015.

The data package available for this STC by Peregrine includes installation details for the TCAS II system upgrade. Peregrine's STC offers a simple installation and a very efficient return to service checkout procedure.

For more information on this STC, please contact Peregrine at www.peregrine.aero or 303-325-3873.
