

PRESS RELEASE – 28 SEPTEMBER 2018

Peregrine Receives STC Validation for Brazil on the TCAS II 7.1 Upgrade Solution

On August 13, 2018, the National Civil Aviation Agency Brazil - Agência Nacional de Aviação Civil (ANAC) issued Peregrine STC ST00790DE Brazilian validation. With this validation, the Peregrine STC is now approved for installations throughout most of the Americas, including the United States, Canada, and Mexico.

The Peregrine's STC meets the ICAO Annex 10 TCAS II change 7.1 worldwide mandate, which took effect for existing systems in 2017 and is now being adopted by many member countries around the globe.

Peregrine's president, David Rankin says, "The Peregrine team has been working diligently to extend approval to all North and South American operators. We are excited to offer our STC solution to Brazilian registered aircraft." The Peregrine STC v7.1 update provides optimized logic for the resolution advisories provided to the pilot and improved aural annunciations.

Be ready to upgrade today with Peregrine's STC TCAS II v7.1 for your TCAS upgrade. The STC may be utilized to implement an approved upgrade of the Bendix King CAS 67 system on many legacy business aircraft models including Gulfstream, Falcon, Hawker, Challenger, and Learjet.

FAA STC: ST00790DE | Brazil Validation: 2018S08-07

Mexico Validation: IA-412/2017 | Canadian Validation: SA17-125
