2. Introduction

This document is the Federal Aviation Administration (FAA) Approved Model List (AML) for Supplemental Type Certificate (STC) Number ST01083DE, for installing the Aviation Clean Air (ACA) Airborne Air & Surface Purification System on eligible airplanes listed in Section 4.

Revisions to the AML must be coordinated between the STC holder and the responsible ACO Branch, and require FAA approval.

This AML is only applicable to the 14 CFR, Part 25 aircraft listed in Section 4. Installations in 14 CFR Part 23, Part 27, and Part 29 aircraft are not authorized under this AML.

2.1. Specific Limitations

The following limitation applies to this AML STC:

The resulting impact of increased ionization levels on sensitivity of ionization type smoke detection systems has not been assessed as part of this STC. For this reason, this STC carries a limitation against installation on aircraft that utilize ionization type smoke detection systems within pressurized compartments supplied by ionized air.

3. Certification Basis

The certification basis for each qualified model is specified in the type certificate data sheet (TCDS) and modified by the amendment levels noted in the appendix identified in the approved model list of Section 4.
